

Introducing The Annual Background Screening Dashboard

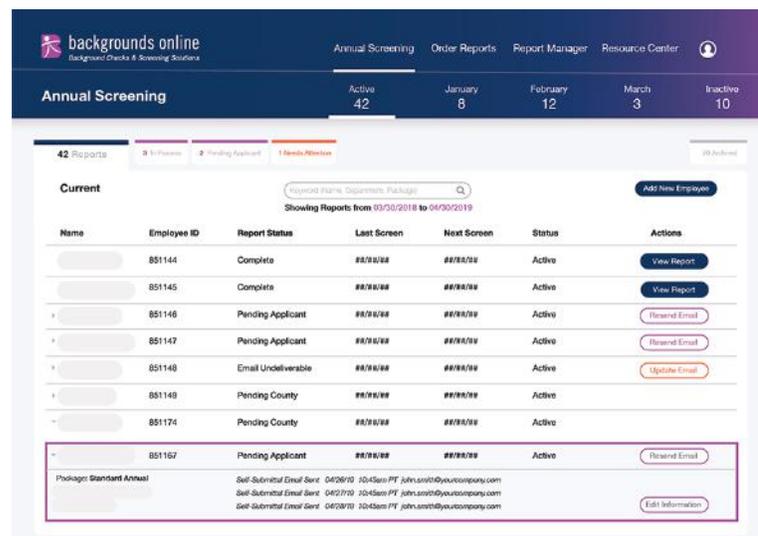

Background Screening is an essential part of the hiring process. More than 92% of employers run background checks on their candidates, contractors and volunteers.

Today, more businesses are relying on annual background checks to further enhance their due diligence process. Annual screenings help employers determine if the people

who represent their organizations remain eligible or if they may pose a risk to the company, staff and public.

To help our clients take advantage of the next stage in background screening, Backgrounds Online is proud to announce we will be launching our Annual Screening Dashboard in June 2019.

About The Dashboard

The Annual Screening Dashboard automates the process for re-screening employees by scheduling, tracking and sending out self-submittal requests. It will show you which people are scheduled to be re-screened in the current and future months.

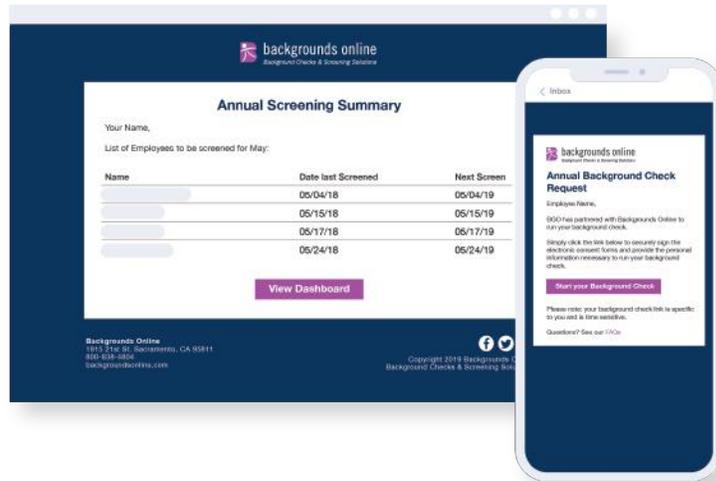

The dashboard will also help you easily manage everyone on your team. You'll see if someone is overdue for a background check, remove inactive employees or easily add someone at your convenience. We will also send you a monthly email to let you know who will be screened in the coming month.

Annual Screening Is A Best Practice

An article from the Society for Human Resource Management (SHRM), discussed the importance of continuing to screen people after they've been hired. The article encouraged human resources managers to adopt this policy to help protect their company from fraud, theft and harm to their reputation.

Implementing ongoing background screening demonstrates you are committed to maintaining a safe work environment for customers and employees. We are creating a simple and efficient tool to help you easily accomplish this important goal.

If an employee incurs a new criminal record and your organization is unaware, it can be damaging to your brand. This is especially true for businesses that work directly with the public in any capacity.

How It Works

You can add your employees to the dashboard or we can do it on your behalf. There will be several ways to accomplish this quickly and easily. Once people are added, you can see when they were last screened and the date of their next screening.

If you need to make a change, such as to a person's name or email address, it can be done instantly. This empowers you to keep your entire roster up-to-date at all times.

Backgrounds Online will offer two convenient annual screening packages that work for most any industry. We can also help you customize a specific background check package for any type of position.

Your employees will receive a co-branded email with your logo and any specific messaging you prefer. It will contain a unique, secure link at which they can provide consent, review required notices and submit the data we need to begin.

The rest is up to us. Most annual background checks will be completed in one to three business days. We'll let you know when it's ready and can inform you if there is something on the report that you may wish to review.

Try The Beta Version

We've built the Annual Screening Dashboard based on our insight and expertise plus feedback from various clients. Whether you represent a small operation, mid-size business or large corporation, our dashboard will make it easy for you to manage your annual screening process.

The beta version is scheduled to launch in early June 2019. If you would like to be among the first to take advantage of this simple, intuitive process, please contact your account manager. Our expert team is here to answer your questions and assist you Monday through Friday from 5am to 6pm PT.
