

The Importance Of Sharing Complete, Accurate Data

When you run background checks on applicants or employees, it is paramount to start with thorough, accurate and current data. This creates the foundation for a smooth, efficient screening scenario and allows you to:

Establish Instant Synergy

Backgrounds Online acts as an extension of your business throughout the background screening process. Our dedicated account managers and highly trained support team work towards a shared goal of ensuring you get the facts you need to make informed decisions.

Save time and resources by leveraging our Candidate Entry System. Your applicants will receive an email invitation to securely submit their background check information when it's convenient for them. Alternatively, you can initiate a background check online by submitting your candidate's information yourself.

Our team works diligently to complete the background check as quickly as possible. If additional information is required for anyone you screen, we will immediately contact them to satisfy any outstanding requirements.

Enhance Your Applicant Experience

Creating a positive screening experience for your candidates gives you a strong advantage over other businesses that are competing for the same top-tier talent. Qualified job seekers can easily find multiple offers in today's marketplace. If their first experience with you is difficult or tedious, they are likely to move on to the next opportunity.

By offering a fast, informative and positive experience, you encourage qualified candidates to accept your offer. As your background screening partner, we are dedicated to providing superior service and full transparency to everyone involved. Each person you screen will be empowered to see the current status of their background check and receive real-time updates if a report is delayed.

This eliminates the need for candidates to contact your team with questions.

Accelerate Your Hiring Process

The moment we receive a request from you, our team jumps into action. We check for reportable criminal convictions; verify employment, education and professional licenses; and conduct position-focused searches that help you determine if a candidate is truly qualified.

Having reliable data allows us to expedite your background screening requests. It is equally important for us to offer accurate, authoritative data to you. We meticulously check every order to deliver comprehensive yet concise background checks that meet your requirements and help you make informed decisions.

Have questions about how data can create synergy, encourage candidates to select you and expedite your process so you can start onboarding? Please contact our highly trained team today. We are available Monday through Friday from 5am to 6pm PT to answer questions, help customize industry-specific background screening packages and seamlessly work as an extension of your team.
