

Backgrounds Online Was Named A Top Background Check Provider

Earlier this year we asked you to vote for us as we competed for a spot on the HRO Baker's Dozen for professional background screeners.

The response was overwhelming. Thanks to your input, we were once again included on this prestigious list. We are truly grateful.

Backgrounds Online is committed to being a service-first company. We listen to you and create proprietary background screening solutions that address your specific needs. Thank you for taking time to complete the HRO survey, share your opinions and show us that we're on the right track.

Re-Accredited By The PBSA

Last month, Backgrounds Online was re-accredited by the Professional Background Screening Association (PBSA – formerly the NAPBS). The PBSA recently introduced a more stringent audit and we volunteered to be among the first to go through their enhanced process.

We're proud to have earned re-accreditation with this distinguished association. This shows that we maintain a strong commitment to integrity, compliance, service and proactive engagement in the background screening industry.

SOC 2 Report

We recently completed our annual SOC 2 audit. It was conducted by A-LIGN, a nationwide security and compliance solutions provider.

Our audit once again confirmed we meet the strict criteria established for the Trust Services Principles of Security and Confidentiality. This shows that our system is protected against unauthorized access and the data we use is protected.

We are fully committed to data security and voluntarily undergo this audit each year.

Happy Holidays From Our Team To Yours

The entire team at Backgrounds Online wishes you a happy holiday season. We hope you will enjoy quality time with family, friends and colleagues.

Our office will be closed on December 24 - 25 and January 1. Otherwise, we'll be here to answer questions and address all your background screening needs Monday through Friday from 5am to 6pm PT.

Thank you for being our partner in background screening.
