

## Are You Taking Advantage Of Our Integration Options?

Backgrounds Online offers a variety of Applicant Tracking Software (ATS) integrations that empower you to order background checks directly from your chosen system and receive various status updates, notes and results notifications.

### Supported ATS Partners

With over 25 years of experience building technology to enhance how organizations screen their current and potential employees, we've established relationships with just about every software company in the HR industry. We leverage these relationships to offer end-to-end integrations that let you utilize your favorite ATS to place orders with Backgrounds Online. Explore our Integrations page for a full list of supported partners and see below for a few of our most popular.

Key partnerships include:

BambooHR • Paylocity • Workday • iCIMS • UKG • Greenhouse

We make it easy to integrate with Backgrounds Online so you may streamline your process and seamlessly request screenings. This saves your team time and makes it easier to manage the overall process. If you have a specific integration request outside of our listed partnerships, please contact your account manager to discuss options.

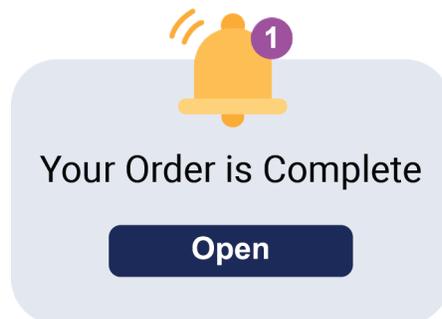

## Simple Setup

We empower you to integrate with most ATS options quickly and easily. In most cases, you can be set up and ready to go the same or next day. Our Integrations page helps guide you through the process swiftly and our friendly, experienced team is always happy to help.

## Efficiency

By connecting your Backgrounds Online account with your desired ATS, you are accelerating your screening process. It gives you a combined source for handling your most critical hiring operations. Hiring can be an extremely competitive activity and streamlining the screening and onboarding process within a single environment gives you a powerful advantage.

Integration may also eliminate the need to enter data into two separate systems. This not only expedites things for your staff; it also helps reduce the likelihood of manual errors.

## Real-time Background Check Updates

When you're hiring, you are probably eager to move things along as quickly as possible. Based on the ATS you use, Backgrounds Online may issue status updates, various notes key to screening turnaround times as well as results notifications. Some software suites even support component-level indicators for specific searches that may require your attention, ultimately saving you time and effort.

## Strong Team Building

Running comprehensive background checks on anyone who might represent your brand is paramount. These reports help hiring managers make informed decisions and maintain safe working environments. Whether you are bringing on employees, contractors or volunteers, you can easily manage it all through your ATS integration and get the facts you need to identify top-tier hires.

## Growing with You

At Backgrounds Online, we are dedicated to always developing better tools and options for you. We regularly add new ATS integration options to help ensure you've got the tools you need to succeed with us.

Are you using an ATS currently supported by Backgrounds Online? Contact your account manager for more information on how to connect your accounts and consolidate some of the most integral parts of your hiring process.

### Have Questions?

If you have any questions about ATS integrations or anything related to background screening, please contact us. Our professional, service first team is available to assist you Monday through Friday from 5am to 6pm PT.
